

## ESPECIFICACIONES TECNICAS FLEJE POLIESTER Y POLIPROPILENO

Producto:	FLEJE DE PLASTICO																																																																																																																																																																								
Código:	PR002																																																																																																																																																																								
Descripción:	FLEJE PLASTICO POLIESTER / POLIPROPILENO																																																																																																																																																																								
Material:	Los flejes de plástico de poliéster y polipropileno están diseñados para sujetar cargas ligeras o pesadas, se puede flejar cajas o pallet contamos con sellos de sujeción para cada aplicación que su envío requiera, para superficies planas, redondas o irregulares según su necesidad, contamos con rollos de fleje de polipropileno para uso manual de usos generales, de Poliéster tipo de usos generales y de alta resistencia todos ellos para uso en herramientas manuales, equipos y sistemas automáticos de flejado.																																																																																																																																																																								
Empaque / Funciones:	Cajas de cartón, bloques de madera, duelas, polines y triplay, pacas de ropa y algodón, pacas de material compresible y expandible, rollos de papel, paquetes de folletos, libros y revistas, tubos de plástico, pisos y losetas, paquetería y envíos, muebles en general, pallet grandes y ligeros, etc.
